## EDUCATIONAL / PROFESSIONAL SUMMARY

I have a background in multiple retail positions, ultimate that wasn't what I wanted from life, I decided to broaden my skillsets and serve my country which led me to the United States Air Force. The leadership skills I developed allowed me to successfully manage various workplaces after my honorable separation. I felt a strong desire to continue to serve my community, so I pursued Emergency Medicine. I graduated top of my class from Malcolm X community college, with a license to practice as an EMT-B. I worked at the forefront of the Covid crisis, managing EMS teams and testing centers.

Satisfied with my service I decided to make a career change to web development. I am currently enrolled at Northwestern University's full-stack web development course. As a part of the curriculum, I have developed multiple applications including: a proof-of-concept website to connect workers with unions, an application to hold workplaces accountable for their safety protocols, and many more you can find on my GitHub.

## EXPERIENCE

### **MICROCENTER, Chicago, IL**

#### *Lead Salesperson*

- Created a top tier client experience through extensive product knowledge.
- Utilized relationship with vendors to provide clients with complete solutions.
- Provided expert level troubleshooting to clients while upselling essential products.
- Maintained high client retention while cultivating new client growth.

### **EXPERIMAC, Chicago, IL**

#### *Assistant Manager*

- Expert in machine disassembly and testing.
- Advanced software/hardware repair services.
- Oversaw daily operations and logistics to ensure efficient workflow and maximize productivity.
- Built/maintained client base through exceptional customer service.

### **NORTHWESTERN MEDICINE, Chicago, IL**

#### *Emergency Medical Technician*

- Experienced in rapidly creating a comprehensive chief complaint.
- Concisely summarized patients' physical status and complaint to provider.
- Executed all EMT tasks with efficiency and the highest standard of care.
- Operated multiple emergency medical testing spaces at onset of Covid-19 crisis.
- Performed medical interventions to help ensure patient survival.
- Assisted attending physicians with minor invasive procedures.

## EDUCATION

**Northwestern University**

**Evanston, IL**

*Full-Stack Web Development Bootcamp (Expected graduation Jun 2021)*

**Malcolm X**

**Chicago, IL**

*Emergency Medicine EMT-B (Jan 2019)*

**Community College of the Air Force**

*3m031 Job Training*

## PROJECTS

*Unify*

Serving as the project manager for this application, it was built as a proof-of-concept to help bridge workers with unions. It utilizes multiple API's, including Google Maps, a Google scrapper, and a geolocator. We built this using Materialize for our CSS and jQuery for our JavaScript. We were able to complete our concept build in 5 days, start to finish.

*Team Profile Generator*

This CLI application was built to allow workplaces to generate an HTML page of a team with their contact information. We utilized Bootstrap for our CSS, and a class constructor model for our worker creation. We also included a test suite to allow users to test classes.

*Rate My Workplace*

Again, serving as project manager, we completed this project by our deadline of 4 days. This application was built to allow employees to rate their workplaces based on safety criteria. It was built using a Model-View-Controller design, to dynamically create webpages utilizing handlebars. Data from this site is stored with Jaws on Heroku, or locally with MySQL. We decided to use non environment variable storage with dotenv, server management with Express, database management with Sequelize, and password encryption with bcrypt.

## ADDITIONAL SKILLS

- HTML5
- CSS (Vanilla, Bootstrap, Materialize)
- JavaScript (jQuery, Node, React, Sequelize, Express)
- Databases (MySQL, MongoDB)
- API's
- Operating Systems (Windows 7-10, MacOS)
- Emergency Medicine (CPR, Basic Life Support, EMT-B, Emergency Team Lead)
- Microsoft Suite (Excel, PowerPoint, Word)
- Other (Project Management, Problem Solving, Leadership, Training, Sales, Analytical, Strong Under Pressure)

## CERTIFICATIONS

- Emergency Medical Technician – Basic
- CPR (AHA & Red Cross)
- Basic Life Support (Red Cross)
